August 19, 2016

TO: UF/IFAS Faculty
FROM: John M. Davis
SUBJECT: 2017 NSF Major Research Instrumentation Program

The call for the [NSF Major Instrumentation Grants](#) has been issued. If you are interested in applying, please pull together your team and send an email briefly outlining who will be involved, what the equipment request will be (equipment and estimated cost), and identify the point person. In short, send an e-mail version of a **brief Letter of Intent** by **Friday, September 16th, 2016**. These LOIs are for our office to plan for review – however, your development of your pre-proposal should continue separately.

We request your completed pre-proposal, following the instructions in the hyperlink above, by close of business **Friday, October 7th, 2016**. This will allow us to rank them and send them to the University-level review team by the October 14th deadline. Alexandra Roque (roquea@ufl.edu 273-3448) will be coordinating in the Dean's Office on my behalf.
