October 26, 2018

TO: UF/IFAS Faculty
FROM: Sherry L. Larkin
SUBJECT: 2019 UF/IFAS Undergraduate Summer Research Internship Program | Faculty Projects

The Florida Agricultural Experiment Station (FAES) is again sponsoring a summer research intern program. Undergraduate students (juniors and above) in the College of Agricultural and Life Sciences (CALs) will apply to work, and they will be matched with a research faculty member. Faculty advisors will receive \$3,700 to appoint their intern at \$14 per hour for 240 hours (students can work full-time for six weeks or part-time over the summer – this program allows this kind of flexibility).

The intent of this program is to introduce CALs undergraduates to research and future careers in science, with a priority for students who have yet to participate in a paid research experience.

If you are interested in providing a professional work experience on one or more of your REEport Project objectives, please enter the dates, location of employment, 200 word description and brief list of intern duties at our submission site: [here](#). Please have your project submitted by **Tuesday, November 20, 2018**.

In order to help facilitate the matchmaking process, these descriptions will be available for the students to view online beginning November 21, 2018.

As with last year, unmatched projects can be added to the site for Volunteer Opportunities: [here](#). This site is still undergoing changes, so if you see an old project you would like removed, please reach out to Brian Gray (seven7@ufl.edu).

Please call or e-mail Sherry Larkin (slarkin@ufl.edu) or Cassandra Sexson (cjlema@ufl.edu) with any questions about this program.
