To determine if a specific journal is peer-reviewed, follow these steps:

1. **Search:**
   a. From the Marston Science Library webpage [https://marston.uflib.ufl.edu/](https://marston.uflib.ufl.edu/) select "Search the Catalog."
   
      ![Search the Catalog](image)

      b. In the search box, type the title of the journal and click the magnifying glass.

2. **Results List:** Matching journal titles will appear in a results list, sorted by relevance – best matches will appear at the beginning of the list.

   ![Search Results](image)
In this example, both formats (print and online) of the journal are listed. When you click "available at" you will find that the print copy is available at two locations: FLARE and MARSTON SCIENCE LIBRARY.

3. Availability:

Click the link for "Available online" to see links to full text access and the date range of coverage provided by each resource.

Peer-reviewed:

You can refine your search results to peer-reviewed journals by selecting that link on the left under Availability. Your search results will now show an icon 🦂 and "PEER REVIEWED." Please note that not all articles in peer-reviewed journals may be peer-reviewed.
Additional sources for confirming peer-reviewed:

- Ulrich’s [http://ulrichsweb.serialssolutions.com/](http://ulrichsweb.serialssolutions.com/) Search for a journal and look for the referee icon
- Directly with the journal Web site – Check “About this journal” or “Guide for Authors” sections. The information may be difficult to determine.

Please contact the UF/IFAS Publication Coordinator if you have any questions or would like assistance in determining Peer-reviewed of a journal.
