Configure VPN to access UF Library resources when not using the UF wireless network

How do I configure the UF Virtual Private Network (VPN) to access Web of Science, EndNote Web and other library resources when I am not on the UF wireless network?

In order to export citations from Web of Science into EndNote Web as recommended, you need to connect to the UF VPN when you are not using the UF wireless network. To connect to the VPN follow the instructions here for Option 2:
